DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 4/15/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The prior art not considered has been lined through on the enclosed copy of Form 1449. These references were not in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 -- 24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Grams et al. Applicant is directed to the abstract, which discloses the load/unload capability, and to col. 1, lines 15+, which teach the automated loading/unloading of tubs or trays onto pallets and carts for placement onto trucks. Additionally, the reference teaches the conveying surface is a conveyor belt, and the Examiner contends that a conveyor belt is inherently a continuous loop.
